According to our (Global Info Research) latest study, the global Adagen market size was valued at USD 81 million in 2023 and is forecast to a readjusted size of USD 106.4 million by 2030 with a CAGR of 4.0% during review period.

Adagen Injection is a modified enzyme used for enzyme replacement therapy for the treatment of severe combined immunodeficiency.

The market driver for Pegademase (pegademase bovine) is its essential role in treating patients with adenosine deaminase deficiency (ADA-SCID). As a life-saving enzyme replacement therapy, Pegademase helps restore immune function. Its niche target population and limited treatment options contribute to its growth. However, challenges include potential side effects, high treatment costs, and the need for lifelong administration. Additionally, accessibility and awareness of the therapy can be challenging in some regions. Despite challenges, Pegademase's crucial therapeutic role and ongoing research in ADA-SCID present opportunities for market expansion and improved patient outcomes.
