Abstracts

The global Adalimumab (Humira) and Biosimilar market size is expected to reach \$ 16210 million by 2029, rising at a market growth of -4.9% CAGR during the forecast period (2023-2029).

The expiration of patents for adalimumab (Humira) has emerged as a significant driver in the biosimilar market. Adalimumab is a widely used biologic medication for autoimmune diseases. The patent expiry allows for the entry of biosimilar versions of Humira, which are highly similar and offer a more cost-effective alternative. This increased competition fosters price reduction and improved accessibility for patients, addressing the growing demand for affordable treatments. Furthermore, regulatory support for biosimilars has further bolstered their adoption, ensuring safety, efficacy, and quality. Overall, the patent expiration and regulatory support are key drivers propelling the adalimumab biosimilar market forward.

Adalimumab is a tumor necrosis factor (TNF) blocker that reduces the effects of a substance in the body that can cause inflammation.

This report studies the global Adalimumab (Humira) and Biosimilar production, demand, key manufacturers, and key regions.
