According to our (Global Info Research) latest study, the global ADAS Calibration Systems market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

New cars come outfitted with advanced driver assistance systems (ADAS). These advanced safety systems use sensors to gather information about vehicle surroundings. Sensors collect data that provides safety warnings. ADAS can even use sensor data to know when to take temporary control over a vehicle's braking or steering, all in the name of driver safety. As with all sensors, vehicle ADAS sensors are only as accurate as they are calibrated to be. Enter ADAS calibration, a fast-growing need in the automotive industry.
