Abstracts

The global ADAS Calibration Systems market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

New cars come outfitted with advanced driver assistance systems (ADAS). These advanced safety systems use sensors to gather information about vehicle surroundings. Sensors collect data that provides safety warnings. ADAS can even use sensor data to know when to take temporary control over a vehicle's braking or steering, all in the name of driver safety. As with all sensors, vehicle ADAS sensors are only as accurate as they are calibrated to be. Enter ADAS calibration, a fast-growing need in the automotive industry.
