According to our (Global Info Research) latest study, the global ADC Outsourcing Service market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

The driving factors for ADC outsourcing services mainly include the following aspects:

Technological progress: Technological progress in ADC drug development is one of the key factors driving the development of ADC outsourcing services. With the continuous development of biotechnology, improvements in new coupling technologies and linker design have made the development and production of ADC drugs more complex. In order to cope with these technical challenges, many pharmaceutical companies choose to outsource the R&D and production of ADC drugs to professional CDMO companies to leverage their expertise and experience.

Cost reduction: Cost reduction is another important factor driving ADC outsourcing services. For many pharmaceutical companies, the development and production of ADC drugs is an expensive undertaking that requires significant investment. By outsourcing this part of the business to CDMO companies, pharmaceutical companies can reduce R&D and production costs while obtaining more efficient and professional services.

Accelerate the launch process: ADC outsourcing services can help accelerate the launch of drugs. CDMO companies usually have extensive experience in drug development and production and can provide end-to-end services from drug discovery to commercialization. By partnering with CDMO companies, pharmaceutical companies can bring drugs to market faster and meet patient needs.

Growth of market demand: With the continuous development of biotechnology, the ADC drug market is showing a rapid growth trend. In order to meet market demand, many pharmaceutical companies need to increase investment in the development and production of ADC drugs. However, not all companies have comprehensive R&D and production capabilities, so they need to rely on the professional services of CDMO companies to meet market demand.
