## Abstracts

The global Adhered Masonry Veneer market size is expected to reach \$ million by 2030, rising at a market growth of % CAGR during the forecast period (2024-2030).

Adhered masonry veneers typically consist of natural stone cut into thin sections, thin brick (masonry brick units sawn into thin sections), cultured stone (cast concrete units that look like natural stone), and stucco. An adhered masonry veneer is a cost-effective way for a home owner or commercial property owner to keep the appearance of masonry in the facade, when budgets or design considerations don't allow the use of full-sized masonry units.
