Adhesives for Batteries are a type of special adhesive material designed to meet the needs of bonding, sealing and fixing in the battery manufacturing process. This type of adhesive plays a key role in the assembly of battery components, ensuring the stable connection between the components inside the battery and the sealing of the external package. They not only need to have excellent mechanical properties, such as high-strength bonding and good flexibility, but also need to meet some special environmental requirements, such as high temperature resistance, flame retardancy, thermal conductivity and electrical insulation.

The key players of adhesives for batteries include Henkel, 3M, SIKA, Huntsman Corporation, Momentive, Wacker, Arkema, DOW and Parker Hannifin, etc. The top nine players hold a share over 55 percent. Currently the adhesives for batteries are mainly produced in the United States, Europe and China, these three regions have a share over 80%. In terms of product type, in next few years, Thermal Conductive Adhesive will grow faster, while in terms of application, Power Batteries is the largest application, with a share about 78% and the share will increase in future.
