Adiponitrile is the organic compound with the formula $(CH_2)_4(CN)_2$. This dinitrile, a viscous, colorless liquid, is an important precursor to the polymer nylon-6,6. In 2005, about one billion kilograms were produced.

Scope of the Report:

This report focuses on the Adiponitrile in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. Asia Pacific will grow significantly over the next seven years as a result of swift growth in textile industry coupled with huge demand for tyre cord particularly in India and China. Moreover, rapid development in the automotive sector in China is likely to enhance the consumption for adiponitrile in the near future. Furthermore, Government of India's initiative of "Make in India" is predicted to boost the demand for adiponitrile in this region.

Europe is predicted to grow substantially over the next seven years on account of mounting automotive sector in various countries including Sweden, Italy and Germany. Moreover, higher consumption of carpets and fiber products is likely to boost the demand growth over the forecast period. Latin America and MEA will provide ample of opportunity for growth on account of increasing demand from industrial sector, as a result of accelerating consumption in conveyor belts, tire cords and electro-insulating materials.

The worldwide market for Adiponitrile is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017,
