The adjustable daisy chain is a multifunctional connection equipment designed for rock climbing, mountaineering and aerial work. Compared with the traditional fixed-length daisy chain, it has the ability to adjust the length quickly and flexibly. It is usually composed of high-strength webbing and sliding locks or independent links. Users can change the position of the connection point at any time through simple operations according to actual needs to achieve more precise safety anchoring or posture adjustment. The adjustable daisy chain can effectively improve the efficiency and safety of use, and is especially suitable for multi-stage climbing, wall hanging, line clearing and rescue scenarios. With the increasing requirements of rock climbing for lightweight, convenient and safety standards, the adjustable daisy chain has been rapidly popularized in recent years and has become an important part of the rock climbing equipment system.
