Abstracts

An adult diaper (or adult nappy) is a diaper made to be worn by a person with a body larger than that of an infant or toddler. Diapers can be necessary for adults with various conditions, such as incontinence, mobility impairment, severe diarrhea or dementia. Adult diapers are made in various forms, including those resembling traditional child diapers, underpants, and pads resembling sanitary napkins (known as incontinence pads).

Scope of the Report:

This report focuses on the Adult Diaper in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. Growing aging population, urbanization and increased awareness of treatment methods for urinary incontinence are expected to be the major drivers for the global adult diaper market. Aging population, economic affluence and improvement of the healthcare sector are expected to support the adult diaper market growth in the near future. However, volatility in prices of raw material may curb the demand for adult diaper within the forecast period. Also, ever increasing demand for the new products which includes body fit, skin friendly, superior absorption, stretchable, stylish and odor free is expected to grow new opportunities in the adult diaper market. The worldwide market for Adult Diaper is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
