Abstracts

The global Adult Wrist/Ankle Mosquito Repellent Ring market size is expected to reach \$ 309 million by 2032, rising at a market growth of 5.6% CAGR during the forecast period (2026-2032).

Global production of adult wrist/ankle mosquito repellent rings reached 60.215 million units in 2025, with an average selling price of US\$3.4 per unit. Adult wrist/ankle mosquito repellent rings are wearable mosquito repellent products designed for adults and worn on the wrist or ankle. They release volatile repellent ingredients (commonly plant essential oil formulas, such as citronella, geraniol, lemon eucalyptus oil, etc., or a few using synthetic repellents) to create a close-range, localized odor repellent zone around the wearer, reducing the probability of mosquitoes approaching and biting. A small number of wearable models also use "ultrasonic/electronic" technology as a selling point. The upstream of the industry chain includes substrates (silicone/TPR/TPE, webbing/nylon, buckles), active ingredients (citronella oil, lemon eucalyptus oil, geraniol, and other essential oils and their carriers), and a small amount of synthetic repellents; the midstream consists of manufacturers, including injection molding/extrusion molding ? essential oil impregnation/coating/microcapsule compounding ? drying and curing ? assembly (replaceable core) ? packaging, etc.; the downstream reaches users through online e-commerce/cross-border platforms, drugstore chains, outdoor product stores, maternal and infant channels, convenience stores/supermarkets, and travel retail. Gross profit margins typically range from 15% to 30%.
