Abstracts

Advanced Wound Care products for the wound healing process are generally prescribed by clinicians after a visit to the doctor or hospital.

Scope of the Report:

Advanced Wound Care products generally includes film and foam dressings, hydrogels, alginates and hydrocolloids. Such products are largely focused on keeping the wound hydrated to encourage healing, following the philosophy that a moist microenvironment promotes the natural healing process (human cells require water to live and grow) without occluding the wound.

The worldwide market for Advance Wound Care is expected to grow at a CAGR of roughly 5.3% over the next five years, will reach 9460 million US\$ in 2023, from 6940 million US\$ in 2017, according to a new GIR (Global Info Research) study.

This report focuses on the Advance Wound Care in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.
