Sensor is a device or an element made for a purpose to detect an occurrence of any event or change in the environmental condition and if found, provide a corresponding output. Broadly, sensor is a transducer which intakes one kind of energy (mostly optical & electrical) to operate & gives different types of output. Today sensors are being used in everyday life in every electronic product and with the advancement in technologies.

The demand for advanced sensors have been increasing in the consumer electronics and automobile vehicle like Cars, trucks, buses, use of advanced sensor is also increased in laptop, smartphones and other smart devices with touch screen display, which are coming out as new trends for advanced sensor market. The key growth drivers of global advanced sensor market are increased adoption of advanced sensors in various industries like healthcare, logistic, and defence, need for advanced security solutions in the automobiles, drastic rising demand of advanced sensor in industrial applications in order to save energy, increased demand in military application for target detection as in drone and aircrafts. These are some other drivers support the growth of global advanced sensor market. On the other hand high replacement as well as deployment cost, lack of privacy, lack of customization & its complexity are some of the restraints responsible to hinder the growth of global advanced sensor market.
