According to our (Global Info Research) latest study, the global Advertising Technology Service Solutions market size was valued at US\$ 862 million in 2025 and is forecast to a readjusted size of US\$ 1469 million by 2032 with a CAGR of 8.0% during review period.

Advertising technology (AdTech) is an umbrella term that refers to the tools and software advertisers use to reach audiences, run digital ad campaigns, and measure the effectiveness of digital ad campaigns. As the process of buying and selling digital ads has become more complex, ad tech has emerged to simplify the process. Common ad tech tools such as demand-side platforms are the integration of a set of technologies that allow advertisers to buy impressions and select audiences across numerous publisher sites. Now, ad technology enables advertisers and ad agencies to efficiently manage integrated ad campaigns. It also enables brands to get the most out of their budgets and helps maximize return on investment (ROI) on digital advertising. Ultimately, the ad tech environment enables advertisers to strategically plan and optimize their ad campaigns.

First, the Advertising Technology Service Solution is rapidly shifting toward AI-driven and fully automated advertising systems. Manual campaign optimization is being replaced by machine learning and intelligent bidding algorithms, enabling more efficient, data-driven decision-making and significantly improving return on advertising spend (ROAS).

Second, privacy regulations and the deprecation of third-party cookies are reshaping the industry landscape. Under frameworks such as GDPR and CCPA, AdTech is

transitioning from third-party cookie dependency to first-party data strategies and identity resolution technologies, forming a new data-driven ecosystem.

Third, cross-media and omnichannel integration are becoming a core trend. Advertising is expanding from single-channel delivery to unified management across mobile apps, web, connected TV (CTV), and short-form video platforms, enabling true omnichannel marketing execution.

Finally, the industry is characterized by the coexistence of walled gardens and open internet advertising platforms. Companies like Google, Meta, and ByteDance operate closed ecosystems, while platforms such as The Trade Desk and Adform promote open programmatic advertising. These two models will continue to coexist and compete in the long term.
