Aerosol propellants are substances used in aerosol products to propel or expel the product from its container. Aerosol propellants function by exerting pressure within the container, which forces the product out through the valve when the valve is depressed. They play a crucial role in delivering various products in aerosol form, such as paints, foams, lubricants, insecticides, air fresheners, and personal care products.

The core manufacturers in global Aerosol Propellants market are Shell, Hebei Kaiyue, Linde, Henan Xinlianxin and Hebei Jichun ,etc, accounting for 24% market share. Shell is the world's largest Aerosol Propellants manufacturer, occupying approximately 7% of the market share. From the perspective of product type, Dimethyl Ether (DME) accounted for a share of 34% in the global Aerosol Propellants market. In terms of application, Personal Care holds the largest share , accounting for 51% share.
