According to our (Global Info Research) latest study, the global Aerosols market size was valued at US\$ 10170 million in 2024 and is forecast to a readjusted size of USD 15190 million by 2031 with a CAGR of 6.0% during review period.

Upright aerosols and inverted aerosols are two different types of aerosol products that are designed for different applications.

Upright aerosols are aerosol products that are designed to be used in an upright position. These products are usually packaged in containers with a valve that dispenses the product when the container is held in an upright position. Upright aerosol products include spray paints, lubricants, and cleaning products, among others.

Inverted aerosols are aerosol products that are designed to be used in an upside-down position. These products are packaged in containers with a specialized valve that allows the product to be dispensed when the container is inverted. Inverted aerosol products include personal care products like hairspray, sunscreen, and air fresheners.

Global aerosols core manufacturers include Sherwin-Williams (Krylon), Nippon Paint, PPG, Rust-Oleum and 3M, etc. The top three manufacturers account for approximately 63% of the global share. North America is the world's largest market, accounting for nearly 37% of the market.

In terms of product type, inverted aerosols occupy a dominant position, accounting for 54%. At the same time, in terms of application, construction is the largest application field, accounting for 22%.
