According to our (Global Info Research) latest study, the global Aerospace Drive Belts market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Aerospace drive belts are used in alternators and generators of aircraft engines. Most of the aerospace drive belts manufactured by the companies are utilized by the general purpose aviation industry. The aerospace drive belts with V-shape are mostly preferred owing to high power transmission capacity and excellent grip properties.

Nearly one-third of passenger aircraft and freighters demand needed for replacement, along with substantial demand for new aircrafts by 2030 is expected to surge the growth of aerospace drive belts. In addition, general economic growth and corporate profits are significant factors contributing to demand aircrafts and consequently raising the demand for aircraft drive belts. Manufacturers are poised to develop aircraft drive belts more reliable and to embody lightweight designs. Expansion of commercial aircraft fleet will likely to facilitate additional growth in aerospace drive belts market.
