According to our (Global Info Research) latest study, the global Aerospace Fasteners market size was valued at USD 3972.4 million in 2023 and is forecast to a readjusted size of USD 5032 million by 2030 with a CAGR of 3.4% during review period.

Aerospace fasteners are the hardware components or devices that are used to mechanically combine two or more objects together or to connect parts of an aircraft during aftermarket servicing and original equipment manufacturing. Aerospace fasteners are durable and secure and aid in enhancing the aircraft's efficiency while reducing its overall weight. They are commonly manufactured using aluminum, titanium and steel, owing to the high tensile/shear strength and corrosion resistance of these metals. These fasteners are used for creating non-permanent joints that can be dismantled or removed without damaging the surrounding equipment. Owing to this, they find extensive applications in assembling commercial and military aircraft, rockets, ballistic missiles and satellites.

Global key players of aerospace fasteners include Precision Castparts Corp, Howmet Aerospace and LISI Aerospace. Global top three manufacturers hold a share about 76%. In terms of product, threaded fasteners is the largest segment, with a share about 83%. And in terms of application, the largest application is civil, which has a share about 85 percent.
