Abstracts

Combination treatment in aesthetic market consists of various treatment approaches such as neuromodulators, derma fillers, topical therapies, intense pulsed light photo rejuvenation, laser therapies, radiofrequency-based therapies and ultra-radiofrequency-based therapies. The market is expected to witness significant growth during the forecast period, owing to several advantages such as synergy of different platform-providing quick results and reduction in number of visits of the dermatologist clinics.

SCOPE OF THE REPORT:

This report studies the Aesthetics Combination Therapy market status and outlook of Global and major regions, from angles of players, countries, product types and end industries; this report analyzes the top players in global market, and splits the Aesthetics Combination Therapy market by product type and applications/end industries.

Due to a booming stock market and rising affluence, the increasing spending power in the United States is boosting the market for nice-to-have services, which include various beauty treatments. The rise in disposable income is more visible amongst the affluent class, who make up the largest customer base for advanced beauty services such as facelifts and rejuvenation therapies like dermal filling, microdermabrasion, chemical peeling, laser treatment and others. Other than this, a rising aging population and a burning desire to restore a youthful appearance are the other boosting factors for generating a healthy demand for beauty treatment services in the U.S. However, this phenomenon is not restricted to the U.S. alone. As per World Bank forecasts, the economic growth in the East Asian and Asia Pacific region is expected to be 5.7% approximately in 2017-18, and will continue to remain stable over the next three years.

Due to this economic prosperity, the nice-to-have high end services in the beauty industry such as facial rejuvenation are going to have a positive impact. Moreover, private consumption expenditure is set to remain close to 8%, which further boosts the economic sentiment in such regions and leads to a deeper regional penetration of the aesthetics combination therapy market. Such factors are expected to create a favorable environment for the adoption of laser treatments and other expensive treatment procedures in the realm of aesthetics. This is set to boost the global aesthetics combination therapy market.

The global Aesthetics Combination Therapy market is valued at xx million USD in 2017 and is expected to reach xx million USD by the end of 2023, growing at a CAGR of xx% between 2017 and 2023.

The Asia-Pacific will occupy for more market share in following years, especially in China, also fast growing India and Southeast Asia regions.

North America, especially The United States, will still play an important role which cannot be ignored. Any changes from United States might affect the development trend of Aesthetics Combination Therapy.

Europe also play important roles in global market, with market size of xx million USD in 2017 and will be xx million USD in 2023, with a CAGR of xx%.
