According to our (Global Info Research) latest study, the global Agate market size was valued at USD 356 million in 2023 and is forecast to a readjusted size of USD 332.8 million by 2030 with a CAGR of -1.0% during review period.

Agates are semi-precious gemstones that are a variegated form of chalcedony, which is silicon dioxide in the form of microscopic fibrous quartz crystals.

Agates naturally develop when an empty pocket inside a host rock fills in molecule-by-molecule, layer-by-layer as these microcrystals self-organize to form concentric bands or other patterns. The colors and arrangement of the microcrystals are influenced by changes in pressure, temperature, and mineral content that occur during the formation process.

Unlike other gemstones, each agate is unique. Even slabs cut from the same specimen will vary in color and design.

Global Agate key players include Antolini, Bartky Minerals, Xinlitun Agate, Yangji Agate, Xinchangbao Agate, etc. Global top five manufacturers hold a share over 15%.
