## Abstracts

According to our (Global Info Research) latest study, the global Age-Friendly Furniture market size was valued at US\$ 2079 million in 2025 and is forecast to a readjusted size of US\$ 2726 million by 2032 with a CAGR of 4.4% during review period.

Age-friendly furniture refers to functional furniture products specifically designed for the elderly. It optimizes structure and refines details based on the principles of safety, convenience, comfort, and accessibility to accommodate physiological changes such as declining vision, slower movement, weakened muscle strength, and reduced balance in older adults. Its design typically includes features such as a non-slip and stable structure, rounded corners for impact protection, height adjustment or height enhancement, handrails, soft-close mechanisms, anti-pinch design, and easy-to-operate hardware systems. It is widely used in home-based elderly care environments, community elderly care centers, and nursing facilities. Age-friendly furniture not only emphasizes ergonomics and safety but also focuses on enhancing psychological comfort and dignity, making it an important component of home renovation and the upgrading of the elderly care industry in the context of an aging society.

Age-friendly furniture refers to functional furniture products specifically designed for the elderly, balancing safety, comfort, and convenience. These products are widely used in home-based elderly care environments, community-based elderly care institutions, and rehabilitation and nursing facilities. Product range includes fall-prevention armchairs, assisted standing sofas and chairs, adjustable nursing chairs, non-slip storage systems, barrier-free bedside tables, assistive standing devices, and modular storage systems. Compared to ordinary furniture, age-friendly furniture places greater emphasis on ergonomics, slip and impact resistance, safe load-bearing capacity, and ease of use in

its structural design, making it an important vehicle for ensuring the safety and improving the quality of life for the elderly.

In recent years, the global aging population trend has continued to accelerate, with the proportion of people aged 65 and above constantly rising, driving the rapid expansion of the elderly care industry. Compared to institutional elderly care, home-based elderly care has become the mainstream elderly care model in most countries due to its lower cost and more family-like atmosphere. Governments around the world have successively introduced policies to support home-based elderly care and age-friendly renovations, providing long-term growth momentum for the age-friendly furniture market. Especially in Asia and Europe, the large aging population and solid demand base indicate significant market potential.

As consumers increasingly demand higher quality and aesthetically pleasing homes, age-friendly furniture is gradually shifting from a 'function-first' approach to a 'function + design integration,' balancing safety and home aesthetics.

In terms of the industry chain, upstream suppliers include board materials, metal structural components, functional hardware, and intelligent control components; midstream suppliers are furniture manufacturers and age-friendly system integrators; and downstream customers include households, elderly care institutions, and real estate renovation projects. The industry as a whole is in a growth phase, with significant differences in company size, and both regional brands and customized companies coexisting. Companies with product development capabilities, ergonomic design experience, and channel integration capabilities have a greater competitive advantage.

From a regional market perspective, Europe and Japan have more mature age-friendly product design and standards systems, the North American market emphasizes comfort and intelligent functions, while the Chinese market is experiencing rapid growth driven by policy and consumption upgrades. With the integration of smart home technology, some age-friendly furniture products are beginning to integrate intelligent sensing, remote monitoring, and auxiliary reminder functions, propelling the industry towards intelligentization.

Looking ahead, the global market for age-friendly furniture will be driven by three main factors: the continued expansion of the aging population; strengthened policy support for home-based elderly care; and increased demand for higher quality and smarter products driven by consumption upgrades. Market growth will come more from product structure upgrades and functional innovations than from simple quantity expansion.

This report is a detailed and comprehensive analysis for global Age-Friendly Furniture market. Both quantitative and qualitative analyses are presented by company, by region & country, by Type and by Application. As the market is constantly changing, this report explores the competition, supply and demand trends, as well as key factors that contribute to its changing demands across many markets. Company profiles and product examples of selected competitors, along with market share estimates of some of the selected leaders for the year 2025, are provided.

**Key Features:**

Global Age-Friendly Furniture market size and forecasts, in consumption value (\$ Million), 2021-2032

Global Age-Friendly Furniture market size and forecasts by region and country, in consumption value (\$ Million), 2021-2032

Global Age-Friendly Furniture market size and forecasts, by Type and by Application, in consumption value (\$ Million), 2021-2032

Global Age-Friendly Furniture market shares of main players, in revenue (\$ Million), 2021-2026

**The Primary Objectives in This Report Are:**

To determine the size of the total market opportunity of global and key countries

To assess the growth potential for Age-Friendly Furniture

To forecast future growth in each product and end-use market

To assess competitive factors affecting the marketplace

This report profiles key players in the global Age-Friendly Furniture market based on the following parameters - company overview, revenue, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include MillerKnoll, Steelcase (HNI), Haworth, Okamura Corporation, HNI, Kokuyo, Paramount Bed Holdings, Itoki Corporation, Hill-Rom, Sauder Manufacturing,

etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

### Market segmentation

Age-Friendly Furniture market is split by Type and by Application. For the period 2021-2032, the growth among segments provides accurate calculations and forecasts for Consumption Value by Type and by Application. This analysis can help you expand your business by targeting qualified niche markets.
