Abstracts

According to our (Global Info Research) latest study, the global Agricultural Centrifugal Water Pump market size was valued at US\$ 4545 million in 2025 and is forecast to a readjusted size of US\$ 6434 million by 2032 with a CAGR of 5.3% during review period.

Agricultural centrifugal water pumps are centrifugal fluid-conveying devices specifically designed for use in agricultural production for purposes such as irrigation, drainage, sprinkler irrigation, drip irrigation, aquaculture, chemical spraying, and rural water supply. In 2025, global Agricultural Centrifugal Water Pump production reached approximately 40,155 k units, with an average global market price of around 110 US\$/Unit. The production capacity of Agricultural Centrifugal Water Pump reaches 53,500 k units, and the industry's gross profit margin is approximately between 25% and 45%.

The development of agricultural centrifugal water pumps is primarily driven by the advancement of food security strategies, the accelerated construction of high-standard farmland, the growing demand for water-saving irrigation amidst water scarcity, the upgrading of rural infrastructure, and in remote areas lacking electricity or with limited power access an increased reliance on diesel-powered and solar-powered pumps. Concurrently, the rise of smart agriculture is propelling the evolution of water pumps toward greater energy efficiency, intelligent control, and remote operation and maintenance capabilities. Future trends will focus on high-efficiency hydraulic designs and the application of permanent magnet motors to reduce energy consumption; the deep integration of solar photovoltaic systems to ensure green energy supply; and the establishment of precision irrigation systems facilitated by the Internet of Things (IoT), soil moisture sensing, and automatic start-stop technologies to further enhance water

utilization efficiency, equipment reliability, and life-cycle economic viability, thereby supporting agricultural modernization and sustainable development.
