Agricultural high-horsepower tractors usually have high engine power, and the horsepower range is generally above 100 horsepower, and can even reach hundreds of horsepower. This enables them to handle large-scale agricultural operations. High-horsepower tractors are often designed with efficiency, stability and reliability in mind. They may be equipped with advanced hydraulic systems, automated controls, air-conditioned cabs, and a variety of additional equipment to increase agricultural productivity. Typical products include John Deere's John Deere 8R, Claas's Claas AXION 900 series, CNH Industrial's New Holland T9 series, etc. With the development of agricultural machinery automation technology, high-horsepower tractors will become more intelligent, equipped with functions such as automatic driving and intelligent operation planning, reducing farmers' labor intensity.
