The global Agricultural Rollers market size is expected to reach \$ 126 million by 2032, rising at a market growth of 2.6% CAGR during the forecast period (2026-2032).

The roller must be one of the simplest agricultural implements in farming today. It is used to flatten land and also to break up the large clods of soil that are often left behind after ploughing. Initially they were pulled by draft animals, but today agricultural rollers are pulled by tractors as trailed implements.

Europe has the largest global export quantity and manufacturers in agricultural rollers market, while the North America is the second sales volume market.

Horsch profits most, while Great Plains and Fleming ranked 2 and 3. The market share of top 3 is about 50%.
