According to our (Global Info Research) latest study, the global Agricultural Sprayer market size was valued at USD 2248.3 million in 2023 and is forecast to a readjusted size of USD 2758.8 million by 2030 with a CAGR of 3.0% during review period.

While sprayers were once a niche product, today sprayers have become an essential piece of farm equipment for effective crop production. By properly applying chemicals to control weeds, insects, and diseases, you give your crop the best chance for high yields. The uptick in self-propelled sprayer ownership started in 2005 when there was an increase in Asian soybean rust and farmers needed to have a sprayer available to make timely fungicide applications. Guidance systems and advanced controls have also made sprayers much easier to operate, contributing to the acceleration of on-farm sprayers.

Global Agriculture Sprayer key players include Hozelock Exel, STIHL, etc. Global top two manufacturers hold a share over 30%.

United States is the largest market, with a share about 20%, followed by France, and Germany, both have a share about 10 percent.

In terms of product, Self-Propelled Sprayer is the largest segment, with a share over 45%. And in terms of application, the largest application is Farmland, followed by Orchard, Urban Greening, Garden, etc.
