Agriculture Machinery is any kind of machinery used on a farm to help with farming. There are many types of such equipment, from hand tools and power tools to tractors and the countless kinds of farm implements that they tow or operate.

Scope of the Report:

This report focuses on the Agriculture And Farm Equipment/Machinery in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

North America dominated the market in 2015. This is ascribed to the advent of machines with better fuel efficiency and improved features in this region that have encouraged farmers to purchase new machinery for agriculture. Another major factor driving the demand for agriculture equipment in North America is the shortage of farm labor.

The strong economic growth in developing nations such as China, India, and the Middle Eastern countries is projected to further drive the farm machinery industry. Asia Pacific is expected to witness the fastest growth over the forecast period. China alone held over 20% of the regional revenue share in 2015.

The worldwide market for Agriculture And Farm Equipment/Machinery is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research)
