The global Agriculture Robot market size is expected to reach \$ 36810 million by 2029, rising at a market growth of 27.9% CAGR during the forecast period (2023-2029).

Global 5 largest manufacturers of Agriculture Robot are John Deere, Trimble, AGCO Corporation, DeLaval and Lely, which make up over 64%. Among them, John Deere is the leader with about 21% market share. Europe is the largest market, with a share about 36%, followed by North America and Asia-Pacific , with the share about 35% and 25%. In terms of product type, Automated Weed Control occupy the largest share of the total market, about 22%. And in terms of product Application, the largest application is Planting, followed by Animal Husbandry.

An agricultural robot is a robot deployed for agricultural purposes. Fruit picking robots, driverless tractor / sprayers, and sheep shearing robots are designed to replace human labor. In most cases, a lot of factors have to be considered (e.g., the size and color of the fruit to be picked) before the commencement of a task. Robots can be used for other horticultural tasks such as pruning, weeding, spraying and monitoring. Robots can also be used in livestock applications (livestock robotics) such as automatic milking, washing and castrating. Robots like these have many benefits for the agricultural industry, including a higher quality of fresh produce, lower production costs, and a decreased need for manual labor.

This report studies the global Agriculture Robot production, demand, key manufacturers, and key regions.
