Abstracts

The global AI Agents in Education market size is expected to reach $ 16825 million by 2032, rising at a market growth of 29.3% CAGR during the forecast period (2026-2032).

AI Agents in Education refer to intelligent educational systems that leverage artificial intelligence agent technologies, large language models (LLMs), retrieval-augmented generation (RAG), machine learning, and automated workflows to provide autonomous interaction, task execution, learning analytics, and decision support for students, teachers, educational institutions, and administrators. Unlike traditional educational software or conversational chatbots, AI agents in education can understand user objectives, analyze learning behaviors, create personalized learning plans, generate educational content, evaluate learning outcomes, and continuously improve the learning and teaching process.

AI Agents in Education are widely applied across various scenarios, including AI tutoring, AI teaching assistants, intelligent assessment, personalized learning, AI-generated educational content, student support services, and education administration. By integrating educational knowledge bases, curriculum resources, learner data, and multimodal AI technologies, AI agents are transforming traditional education models toward more adaptive, personalized, and intelligent learning ecosystems. They are becoming a fundamental technology for digital education, smart campuses, and the next generation of AI-powered learning environments.

Report Scope

This report studies the global AI Agents in Education demand, key companies, and key regions.

This report is a detailed and comprehensive analysis of the world market for AI Agents in Education, and provides market size (US$ million) and Year-over-Year (YoY) growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of AI Agents in Education that contribute to its increasing demand across many markets.

Highlights and key features of the study

Global AI Agents in Education total market, 2021-2032, (USD Million)

Global AI Agents in Education total market by region & country, CAGR, 2021-2032, (USD Million)

U.S. VS China: AI Agents in Education total market, key domestic companies, and share, (USD Million)

Global AI Agents in Education revenue by player, revenue and market share 2021-2026, (USD Million)

Global AI Agents in Education total market by Type, CAGR, 2021-2032, (USD Million)

Global AI Agents in Education total market by Application, CAGR, 2021-2032, (USD Million)

This report profiles major players in the global AI Agents in Education market based on the following parameters - company overview, revenue, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Microsoft, Google, AWS, IBM, Alibaba, Anthropic, OpenAI, Salesforce, Khan Academy, Duolingo, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Stakeholders would have ease in decision-making through various strategy matrices used in analyzing the world AI Agents in Education market
