Abstracts

According to our (Global Info Research) latest study, the global AI Agents in Education market size was valued at US$ 2058 million in 2025 and is forecast to a readjusted size of US$ 16825 million by 2032 with a CAGR of 29.3% during review period.

AI Agents in Education refer to intelligent educational systems that leverage artificial intelligence agent technologies, large language models (LLMs), retrieval-augmented generation (RAG), machine learning, and automated workflows to provide autonomous interaction, task execution, learning analytics, and decision support for students, teachers, educational institutions, and administrators. Unlike traditional educational software or conversational chatbots, AI agents in education can understand user objectives, analyze learning behaviors, create personalized learning plans, generate educational content, evaluate learning outcomes, and continuously improve the learning and teaching process.

AI Agents in Education are widely applied across various scenarios, including AI tutoring, AI teaching assistants, intelligent assessment, personalized learning, AI-generated educational content, student support services, and education administration. By integrating educational knowledge bases, curriculum resources, learner data, and multimodal AI technologies, AI agents are transforming traditional education models toward more adaptive, personalized, and intelligent learning ecosystems. They are becoming a fundamental technology for digital education, smart campuses, and the next generation of AI-powered learning environments.

Report Scope

info@marketpublishers.com

This report is a detailed and comprehensive analysis for global AI Agents in Education market. Both quantitative and qualitative analyses are presented by company, by region & country, by Type and by Application. As the market is constantly changing, this report explores the competition, supply and demand trends, as well as key factors that contribute to its changing demands across many markets. Company profiles and product examples of selected competitors, along with market share estimates of some of the selected leaders for the year 2025, are provided.

Key Features:

Global AI Agents in Education market size and forecasts, in consumption value ($ Million), 2021-2032

Global AI Agents in Education market size and forecasts by region and country, in consumption value ($ Million), 2021-2032

Global AI Agents in Education market size and forecasts, by Type and by Application, in consumption value ($ Million), 2021-2032

Global AI Agents in Education market shares of main players, in revenue ($ Million), 2021-2026

The Primary Objectives in This Report Are:

To determine the size of the total market opportunity of global and key countries

To assess the growth potential for AI Agents in Education

To forecast future growth in each product and end-use market

To assess competitive factors affecting the marketplace

This report profiles key players in the global AI Agents in Education market based on the following parameters - company overview, revenue, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Microsoft, Google, AWS, IBM, Alibaba, Anthropic, OpenAI, Salesforce, Khan Academy, Duolingo, etc.
