Abstracts

According to our (Global Info Research) latest study, the global AI Code Review and SDLC Governance market size was valued at US\$ 924 million in 2025 and is forecast to a readjusted size of US\$ 2464 million by 2032 with a CAGR of 16.1% during review period.

AI Code Review and SDLC Governance platforms serve as software engineering governance frameworks embedded within Git, IDEs, CI/CD pipelines, and artifact repositories. Leveraging large language models, static analysis, dependency risk identification, and test generation technologies, these platforms perform comprehensive functions?including Pull Request (PR) reviews, security vulnerability prioritization, detection of secrets and dependency risks, test case generation, release compliance gating, and R&D efficiency analysis?for both AI-generated and human-written code. The upstream ecosystem encompasses code repositories, IDEs, DevOps toolchains, application security testing, software supply chain security, and large language model capabilities; the downstream market targets software enterprises, financial IT sectors, cloud service providers, automotive software developers, and government/enterprise system integrators. The overall market is driven by the increasing prevalence of AI-generated code and the industry-wide shift toward 'shifting left' in DevSecOps practices, with typical industry gross margins ranging between 60% and 85%.
