Abstracts

According to our (Global Info Research) latest study, the global AI Content Generators for Writing market size was valued at US$ million in 2025 and is forecast to a readjusted size of US$ million by 2032 with a CAGR of %during review period.

AI writing content generators are tools that generate natural language texts through artificial intelligence algorithms. These generators use trained language models (such as GPT, BERT, etc.) to understand user needs and generate grammatically correct and logically coherent text content.

As an important force driving a new round of scientific and technological revolution, artificial intelligence has been of national strategic importance. Many governments introduces polices and increase capital investment to support AI companies. The Digital Europe plan adopted by the European Union will allocate €9.2 billion on high-tech investments, such as supercomputing, artificial intelligence, and network security. In order to maintain its leading position, the United States will increase its investment in artificial intelligence research and development in non-defense fields, from US$1.6 billion to US$1.7 billion in 2022. According to the latest data released by IDC, global artificial intelligence revenue was US$432.8 billion in 2022, a year-on-year increase of 19.120%, including software, hardware and services.
