According to our (Global Info Research) latest study, the global AI-drive AP Automation Software market size was valued at US\$ 1715 million in 2025 and is forecast to a readjusted size of US\$ 3069 million by 2032 with a CAGR of 8.6% during review period.

AI-driven AP Automation Software refers to enterprise software platforms that apply artificial intelligence—such as machine learning, natural language processing (NLP), and computer vision—to automate and optimize accounts payable processes. Core functions include invoice capture and recognition, data extraction, three-way matching, exception handling, approval workflows, fraud detection, and payment execution. Compared with rule-based AP systems, AI-driven solutions continuously learn from historical transactions, improving accuracy in invoice classification, vendor matching, and anomaly detection over time. These platforms are typically delivered as cloud-based SaaS solutions and integrated with ERP, procurement, and treasury systems.
