According to our (Global Info Research) latest study, the global AI-Driven Event Platform market size was valued at US\$ 1923 million in 2025 and is forecast to a readjusted size of US\$ 4187 million by 2032 with a CAGR of 11.7% during review period.

An AI-driven event platform is an intelligent system that integrates artificial intelligence technologies into the entire event management lifecycle, designed to enhance the planning efficiency, participant experience, and operational effectiveness of various in-person, virtual, or hybrid events?including conferences, exhibitions, competitions, training sessions, and brand launch events.

The rise of AI-driven event platforms is primarily driven by enterprises' urgent need to enhance event efficiency and attendee experiences, the widespread adoption of hybrid (online-offline) event models, participants' rising expectations for personalization, and the growing demand for quantifiable marketing results. Concurrently, the maturation of artificial intelligence, big data analytics, and generative AI technologies provides a viable foundation for automating the entire event lifecycle. Furthermore, the post-pandemic acceleration of digital transformation within the events industry?coupled with rising labor costs and intensifying competition?has further compelled organizers to leverage AI for precision recruitment, intelligent operations, and data-driven decision-making, thereby boosting conversion rates, brand influence, and return on investment.
