Abstracts

The global AI Interactive Display market size is expected to reach \$ 1009 million by 2032, rising at a market growth of 10.1% CAGR during the forecast period (2026-2032).

In 2025, global AI Interactive Display approximately 106,684 units, with an average global market price of around US\$ 4,932 per unit. Gross margin is about 43%, the cost is 2,811 usd. The production is about 130,000 units. An AI Interactive Display is an intelligent display device that integrates artificial intelligence, touch display, voice interaction, camera-based recognition, and multimedia processing functions. It enables human-machine interaction, content presentation, intelligent Q&A, data visualization, and remote collaboration. Compared with conventional displays, AI interactive displays not only present information but also recognize faces, gestures, voice commands, and user behavior through AI algorithms, providing personalized interactive services based on different scenarios. These products are widely used in smart offices, education and training, commercial retail, government services, healthcare guidance, exhibitions, cultural tourism, and meeting collaboration.

AI Interactive Displays will develop toward smarter interaction, higher integration, multimodal recognition, and scenario-based applications. As digital transformation expands in smart offices, education, retail, healthcare guidance, and government services, these products will evolve from simple display devices into intelligent terminals integrating display, touch control, voice recognition, camera-based recognition, AI Q&A, remote conferencing, and data management. Future products will increasingly combine large language models, facial recognition, gesture recognition, voice assistants, edge AI chips, and cloud platforms to deliver more natural human-machine interaction and personalized content recommendations. Low-latency collaboration, high-resolution display, energy-efficient design, data security, and software-hardware ecosystem

compatibility will also become key competitive factors, supporting wider adoption in meeting rooms, classrooms, exhibition halls, retail stores, hospitals, and public service centers.
