Abstracts

According to our (Global Info Research) latest study, the global AI Language Translation Services market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

AI-enabled translation services as those able to use AI methods to improve the speed, quality and cost of the language translation workflows. The AI-enabled service with the most profound effect is neural machine translation (NMT). However, other services are now being deployed to augment and automate additional tasks in the enterprise translation process. Examples include: Translation management system workflow classifications that use machine learning (ML) methods to train the workflow classification based on feedback about the results. Adaptive post-editing machine translation (PEMT) and computer-assisted translation (CAT) editing tools that incorporate any edits back into the translation model. Translation risk assessments that use composite AI (that is, multiple different methods) to provide real-time predictions of the level of risk in a given translation. Enterprise translation hubs that allow enterprises, via a single interface, to select the optimal resource — for instance, selecting between different NMT solutions based on cost or quality. NMT data cleaning and preparation services, which allow for improved NMT model training and customization. These solutions may be used to augment the current translation processes or to develop new workflows.

This report is a detailed and comprehensive analysis for global AI Language Translation Services market. Both quantitative and qualitative analyses are presented by company,

by region & country, by Type and by Application. As the market is constantly changing, this report explores the competition, supply and demand trends, as well as key factors that contribute to its changing demands across many markets. Company profiles and product examples of selected competitors, along with market share estimates of some of the selected leaders for the year 2023, are provided.

Key Features:

Global AI Language Translation Services market size and forecasts, in consumption value ($ Million), 2018-2029

Global AI Language Translation Services market size and forecasts by region and country, in consumption value ($ Million), 2018-2029

Global AI Language Translation Services market size and forecasts, by Type and by Application, in consumption value ($ Million), 2018-2029

Global AI Language Translation Services market shares of main players, in revenue ($ Million), 2018-2023

The Primary Objectives in This Report Are:

To determine the size of the total market opportunity of global and key countries

To assess the growth potential for AI Language Translation Services

To forecast future growth in each product and end-use market

To assess competitive factors affecting the marketplace

This report profiles key players in the global AI Language Translation Services market based on the following parameters - company overview, production, value, price, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Tarjama, TransPerfect, RWS, Language IO and Lilt, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals, COVID-19 and Russia-Ukraine War Influence.
