Abstracts

The global AI Mental Health Chatbots market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

AI Mental Health Chatbots have been gaining popularity and developing a trend in recent years. These chatbots are designed to provide support and assistance to individuals struggling with mental health issues. One of the main reasons for the rise in popularity of AI Mental Health Chatbots is the increasing demand for mental health services. Many people are seeking help for their mental health concerns, but there is often a shortage of mental health professionals available to provide support. AI Mental Health Chatbots can help bridge this gap by providing immediate and accessible support to individuals in need. Another reason for the trend is the anonymity and privacy that AI Mental Health Chatbots offer. Some individuals may feel more comfortable discussing their mental health concerns with a chatbot rather than a human therapist. Chatbots can provide a non-judgmental and confidential space for individuals to express their thoughts and feelings. AI Mental Health Chatbots also have the advantage of being available 24/7. Mental health issues can arise at any time, and having access to support whenever it is needed can be crucial. Chatbots can provide immediate assistance and coping strategies to individuals in crisis.

This report studies the global AI Mental Health Chatbots demand, key companies, and key regions.

This report is a detailed and comprehensive analysis of the world market for AI Mental Health Chatbots, and provides market size (US\$ million) and Year-over-Year (YoY) growth, considering 2022 as the base year. This report explores demand trends and competition, as well as details the characteristics of AI Mental Health Chatbots that

contribute to its increasing demand across many markets.

Highlights and key features of the study

Global AI Mental Health Chatbots total market, 2018-2029, (USD Million)

Global AI Mental Health Chatbots total market by region & country, CAGR, 2018-2029, (USD Million)

U.S. VS China: AI Mental Health Chatbots total market, key domestic companies and share, (USD Million)

Global AI Mental Health Chatbots revenue by player and market share 2018-2023, (USD Million)

Global AI Mental Health Chatbots total market by Type, CAGR, 2018-2029, (USD Million)

Global AI Mental Health Chatbots total market by Application, CAGR, 2018-2029, (USD Million).

This reports profiles major players in the global AI Mental Health Chatbots market based on the following parameters – company overview, revenue, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Youper, MoodKit, Woebot, VOS, MoodNotes, Wysa, Limbic, Kintsugi and Rise Up, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Stakeholders would have ease in decision-making through various strategy matrices used in analyzing the World AI Mental Health Chatbots market.

Detailed Segmentation:

Each section contains quantitative market data including market by value (US\$ Millions), by player, by regions, by Type, and by Application. Data is given for the years 2018-2029 by year with 2022 as the base year, 2023 as the estimate year, and 2024-2029 as the forecast year.
