According to our (Global Info Research) latest study, the global Ai and Machine Learning Service market size was valued at US\$ 46170 million in 2025 and is forecast to a readjusted size of US\$ 203990 million by 2032 with a CAGR of 23.9% during review period.

AI (Artificial Intelligence) and machine learning services refer to a range of technologies and tools that leverage artificial intelligence algorithms and techniques to perform tasks traditionally requiring human intelligence. These services encompass various applications, including data analysis, pattern recognition, natural language processing, computer vision, and decision-making. Machine learning is a subset of artificial intelligence (AI). It is focused on teaching computers to learn from data and to improve with experience ? instead of being explicitly programmed to do so. In machine learning, algorithms are trained to find patterns and correlations in large data sets and to make the best decisions and predictions based on that analysis. Machine learning applications improve with use and become more accurate the more data they have access to.

Global key players of Ai and Machine Learning Service include IBM, Google, HPE, AWS, Dell, etc. The top five players hold a share over 32%. North America is the largest market, and has a share about 40%, followed by Europe and Asia-Pacific with share 28% and 24%, separately. In terms of product type, Supervised Learning is the largest segment, occupied for a share of 44%. In terms of application, Manufacturing has a share about 19 percent.
