According to our (Global Info Research) latest study, the global AI Parking Robot market size was valued at US\$ 463 million in 2025 and is forecast to a readjusted size of US\$ 1210 million by 2032 with a CAGR of 14.6% during review period.

AI Parking Robot is an intelligent parking solution driven by artificial intelligence technologies, designed to perform vehicle transfer, positioning, and parking space allocation within structured parking facilities through adaptive robotic systems. It integrates advanced sensing systems, AI-based perception and decision-making algorithms, motion control, centralized parking management software, and mechanical lifting modules to enable autonomous vehicle handling and real-time path optimization in complex parking environments. Compared with traditional AGV-based or fixed mechanical systems, it delivers enhanced decision-making capability, higher operational efficiency, and improved adaptability to dynamic scenarios, significantly optimizing space utilization and throughput while minimizing human intervention. Its advantages include intelligent decision-making, flexible deployment, high space utilization efficiency, reduced labor dependency, improved vehicle turnover rate, and enhanced operational safety. In 2025, the capacity utilization rate was about 70%, and the average gross margin was approximately 20%. Production in 2025 was 16071 units with an average price of 28000 USD per unit. The upstream segment includes servo motors, batteries, drive units, and controllers, with representative suppliers including Siemens, Bosch, Panasonic, Mitsubishi Electric, Inovance Technology, and CATL. The midstream segment focuses on AI system integration, perception and control algorithm development, robotic structure engineering, and parking management platform integration. The downstream segment is primarily concentrated in public parking facilities and commercial parking operators, with representative customers including

Prologis, Simon Property Group, Brookfield Properties, and China Resources Land.
