Abstracts

AI-powered content detector find text that looks like it was generated by an AI writing tool, like ChatGPT. They look at different things in the text, like how predictable, probable, patterned, coherent, original, readable, emotional, toned, and personal it is. They compare the reader with a lot of human-written text and give it a score or a label to show how likely it is to be written by AI. The accuracy of AI-powered content detector depends on many things, like the type and quality of the data, how complex and strong the algorithms are, how they measure and judge their results, and the topic and situation of the text. Different AI-powered content detector may be more or less accurate for different kinds of text and tasks.

According to our (Global Info Research) latest study, the global AI-powered Content Detector market size was valued at US$ million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of %during review period.

This report is a detailed and comprehensive analysis for global AI-powered Content Detector market. Both quantitative and qualitative analyses are presented by company, by region & country, by Type and by Application. As the market is constantly changing, this report explores the competition, supply and demand trends, as well as key factors that contribute to its changing demands across many markets. Company profiles and product examples of selected competitors, along with market share estimates of some of the selected leaders for the year 2024, are provided.

Million), 2019-2030

Global AI-powered Content Detector market size and forecasts by region and country, in consumption value ($ Million), 2019-2030

Global AI-powered Content Detector market size and forecasts, by Type and by Application, in consumption value ($ Million), 2019-2030

Global AI-powered Content Detector market shares of main players, in revenue ($ Million), 2019-2024

The Primary Objectives in This Report Are:

To determine the size of the total market opportunity of global and key countries

To assess the growth potential for AI-powered Content Detector

To forecast future growth in each product and end-use market

To assess competitive factors affecting the marketplace

This report profiles key players in the global AI-powered Content Detector market based on the following parameters - company overview, revenue, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include GPTZero, AI Detector Pro, Crossplag, Kazan SEO, Passed.AI, Content at Scale, Copyleaks, Hugging Face, QuillBot, Originality.ai, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Market segmentation

AI-powered Content Detector market is split by Type and by Application. For the period 2019-2030, the growth among segments provides accurate calculations and forecasts for Consumption Value by Type and by Application. This analysis can help you expand your business by targeting qualified niche markets.
