Abstracts

The global AI-Powered Public Relations Solutions Platform market size is expected to reach \$ 15024 million by 2032, rising at a market growth of 12.2% CAGR during the forecast period (2026-2032).

An AI-Powered Public Relations (AI PR) Solutions Platform is an integrated end-to-end software system embedded with large language models (LLMs), natural language processing (NLP), computer vision, predictive machine learning, sentiment analysis and intelligent matching algorithms. It digitizes, automates and optimizes the full lifecycle of corporate public relations workflows, replacing fragmented manual PR operations across media monitoring, content creation, journalist outreach, crisis management, media distribution, performance analytics and brand reputation governance.

Unlike traditional static PR software limited to contact management and simple news release distribution, AI PR platforms process massive multi-source media data (news, social media, podcasts, forums, AI search engines), autonomously identify communication opportunities and reputational risks, generate brand-consistent PR content, intelligently match brands with relevant journalists, and output data-driven PR strategy reports.

This report studies the global AI-Powered Public Relations Solutions Platform demand, key companies, and key regions.

This report is a detailed and comprehensive analysis of the world market for AI-Powered Public Relations Solutions Platform, and provides market size (US\$ million) and Year-over-Year (YoY) growth, considering 2025 as the base year. This report

explores demand trends and competition, as well as details the characteristics of AI-Powered Public Relations Solutions Platform that contribute to its increasing demand across many markets.
