## Abstracts

According to our (Global Info Research) latest study, the global AI SDK Software market size was valued at US\$ 280 million in 2025 and is forecast to a readjusted size of US\$ 422 million by 2032 with a CAGR of 5.0% during review period.

AI software development kits (AI SDKs) provide developers with pre-built components, libraries, and tooling to embed artificial intelligence capabilities directly into applications. These kits enable teams to integrate AI features such as language processing, computer vision, speech recognition, generative functions, or agentic behavior without building core AI infrastructure from scratch. AI SDKs accelerate product development and reduce the complexity of implementing AI powered functionality. Rather than managing model training pipelines, infrastructure orchestration, or low level system configuration, developers can use structured SDK components to integrate AI features into web, mobile, desktop, or embedded applications.
