Abstracts

The global AI Therapy Chatbots market size is expected to reach $ million by 2030, rising at a market growth of % CAGR during the forecast period (2024-2030).

AI therapist chatbots utilize natural language processing and machine learning to simulate conversations with users about their mental health. They aim to increase access to affordable mental healthcare, with over 40 chatbots now available globally. Studies show AI chatbots rate higher in quality and empathy than physicians in certain contexts.

This report studies the global AI Therapy Chatbots demand, key companies, and key regions.

This report is a detailed and comprehensive analysis of the world market for AI Therapy Chatbots, and provides market size (US$ million) and Year-over-Year (YoY) growth, considering 2023 as the base year. This report explores demand trends and competition, as well as details the characteristics of AI Therapy Chatbots that contribute to its increasing demand across many markets.

Highlights and key features of the study
