The global AI Vector Generator market size is expected to reach \$ 1689 million by 2032, rising at a market growth of 10.3% CAGR during the forecast period (2026-2032).

AI Vector Generator is an artificial intelligence system that automatically creates vector graphics (scalable images defined by mathematical points, lines, and curves) from various input sources, bypassing or assisting traditional manual illustration processes. Unlike traditional design tools requiring manual anchor point placement, these systems generate ready-to-edit vector artwork through machine learning models trained on massive datasets of vector graphics.
