Abstracts

According to our (Global Info Research) latest study, the global Aids to Navigation System market size was valued at USD 404.4 million in 2023 and is forecast to a readjusted size of USD 522.3 million by 2030 with a CAGR of 3.7% during review period.

The term 'aids to navigation' includes buoys, day beacons, lights, lightships, radio beacons, fog signals, marks and other devices used to provide 'street' signs on the water. Unlike the roads and highways that we drive on, the waterways we go boating on do not have road signs that tell us our location, the route or distance to a destination, or of hazards along the way. Instead, the waterways have AIDS TO NAVIGATION (or ATONs), which are all of those man-made objects used by mariners to determine position or a safe course. These aids also assist mariners in making a safe landfall, mark isolated dangers, enable pilots to follow channels, and provide a continuous chain of charted marks for precise piloting in coastal waters.

Global key players of aids to navigation system include Sealite, Sabik Marine, Pharos Marine Automatic Power, Orga BV, Julius Marine GmbH, etc. Global top five manufacturers hold a share over 31%. The key players are mainly located in Europe, North America, Japan, Australia and South Korea. In terms of product, buoys is the largest segment, with a share over 29%. And in terms of application, the largest application is coastal & port, with a share over 56%.
