According to our (Global Info Research) latest study, the global Aerobridge market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Aerobridge is an enclosed, movable bridge which connects the airport terminal to aircraft parked there, so passengers can move directly to and from the plane without having to step out onto the tarmac.

Increasing passenger traffic at domestic as well as international airports is expected to drive the market. Moreover, increasing investments in installing operating aerobridges for domestic flights and rise in passenger in tier-II cities of developing countries are also expected to drive the market. However, lack of technical knowledge in handling the aerobridge causing accidents may limit the growth of the market.
