## Abstracts

The global Air Beds market size is expected to reach \$ 3534 million by 2032, rising at a market growth of 2.9% CAGR during the forecast period (2026-2032).

An air mattress, also known as an airbed, is an inflatable mattress, the majority of which are usually made of polyvinyl chloride (PVC), although recently developed textile-reinforced urethane plastic or rubber versions exist. The deflated mattress can be rolled up or folded and carried or stored relatively easily, making them a popular choice for camping trips and for temporary bedding at home for guests. They are inflated either orally by blowing into a valve, or with a manual foot-powered or more commonly inflated via an electric pump. Some are even automatically inflating (up to a certain pressure—some additional inflation is also needed) just by opening the valve.

Global Air Beds key players include INTEX, Jilong, Best Way, Insta-bed, Simmons, etc. Global top five manufacturers hold a share about 50%. China is the largest market, with a share about 35%, followed by North America, with a share about 25 percent. In terms of product, PVC is the largest segment, with a share about 75%. And in terms of application, the largest application is In-home, followed by Out-door.

This report studies the global Air Beds production, demand, key manufacturers, and key regions.
