Abstracts

The global Air Blowers market size is expected to reach \$ 2429 million by 2032, rising at a market growth of 2.7% CAGR during the forecast period (2026-2032).

Blowers are mechanical or electro-mechanical devices used to induce gas flow through ducting, electronics chassis, process stacks, etc.--wherever flow is needed for exhausting, aspirating, cooling, ventilating, conveying, and so on. Key specifications include intended application, blower type, port design, as well as the parameters of flow capacity, electrical ratings, and dimensions. Blowers cool electronic enclosures, induce drafts in boilers, increase airflow on engines, and are configured in a variety of designs such as centrifugal flow or rotary lobe styles. Motors usually drive blowers, though they can be powered by other means such as engines. This report studies the Air Blowers market, focusing on Industrial use air blower types, including Positive Displacement Blowers, Centrifugal Blowers, etc.

Global Air Blowers key players include Atlas Copco, Gardner Denver, Howden, Kaeser Kompressoren, Aerzen, etc. Global top five manufacturers hold a share about 55%. Asia-Pacific, North America and Europe is the largest sale market, each one with a share about 30%, followed by South America, with a share about 2 percent. In terms of product, Roots Blower is the largest segment, with a share about 50%. And in terms of application, the largest application is Water Treatment Plant, followed by Chemical and Petrochemical.
