The global Air Blown Fiber Optic Cable market size is expected to reach \$ 440 million by 2029, rising at a market growth of 2.5% CAGR during the forecast period (2023-2029).

Air Blown Fiber Optic Cable (ABFOC) is a type of fiber optic cable that uses compressed air to install and replace optical fibers. It has several advantages over traditional fiber optic cables, such as flexibility, scalability, and ease of installation and maintenance.

The global market for ABFOC is expected to grow significantly in the coming years due to the increasing demand for high-speed internet and data transmission. The rise of cloud computing, big data, and the Internet of Things (IoT) is driving the need for faster and more reliable communication networks.

Moreover, ABFOC is also being used in various industries such as healthcare, transportation, and aerospace, where high-speed data transmission is critical. The increasing adoption of ABFOC in these industries is expected to further boost the market growth.
