Abstracts

The global Air Caster Skids System market size is expected to reach $ 263 million by 2032, rising at a market growth of 5.9% CAGR during the forecast period (2026-2032).

In 2025, the global production volume of Air Caster Skids System reached approximately 18,000 sets, with an average selling price of US$8,500/set, a production capacity of approximately 22,000 sets, and a gross margin of 35%.

Air Caster Skids System is a material handling system that uses compressed air to create a thin air film between heavy equipment and the ground, converting friction into near-frictionless movement. The system typically consists of multiple air caster modules, load-bearing frames, air supply units, and control components. Based on the air flotation principle, it enables smooth and flexible movement of large equipment, precision machinery, and ultra-heavy loads. Air Caster Skids Systems offer advantages including high load capacity, flexible maneuverability, minimal floor damage, and easy installation, and are widely used in industrial equipment handling, precision equipment installation, heavy manufacturing, aerospace, energy equipment, and large-scale engineering projects.

The global Air Caster Skids System market is relatively niche but has high technical barriers, with demand mainly coming from heavy industrial equipment transportation and specialized installation projects. North America and Europe have developed earlier in this field, with companies such as AeroGo, Airfloat, Solving, Hovair System, and Aerofilm Systems holding significant market positions due to their technological expertise and experience in high-end projects. In recent years, increasing construction of renewable energy facilities, large semiconductor equipment, aerospace manufacturing systems, and heavy industrial infrastructure has driven demand for safer,

more efficient, and low-damage handling solutions. In the future, Air Caster Skids Systems are expected to develop toward higher load capacity, more precise control, modular designs, and intelligent material handling solutions.
