## Abstracts

The global Air-Cooled Argon-Ion Laser market size is expected to reach \$ 163 million by 2029, rising at a market growth of 3.9% CAGR during the forecast period (2023-2029).

The argon laser is a unique gas laser, as it uses a noble gas (argon) as the active medium. It is commonly referred to as argon ion laser. It was invented by William Bridges at the Hughes Aircraft Labs in the year 1964. This laser uses argon gas in the ionised state (Ar+) as the lasing medium. It is a vital member of the noble gas laser family as it is capable of generating a large number of discrete lines having wavelengths that range from the UV region (275.4 nm) to near infrared region (752 nm).
